

Sound Isolation and reduction requires a heavy, solid surface to act as a noise barrier. Two layers of solid material separated by substantial air provide more significant noise reduction. To further increase noise reduction, the air between the surfaces is filled with soft, sound absorbing material.

The Cell Zone® Specifications

Sizes and Weights:

Model SI200S 36" Width x 86" Height 525lbs
Model SI200ST 41" Width x 86" Height 620lbs
Model SI248ST 50" Width x 86" Height 750lbs
